Usage

Generally the user can be able to read the news through slides. The user may also select the category in which he/she was interested. User can also create a news article with the help of the floating button. But the user created news will not be published directly into the public. For this, the news has to be approved. For approval purpose, the news article will be send to that news area local people. So that the news will only be able to posted after few approvals.

Here the users needs not to wait for all of his new articles. For each article, the user will be awarded some News Points(NP) which will help in reducing the number of approvals. These points will also be gained through the increase in number of likes, comments and shares in his/her article.

Here, all the people who needs to write an article, will have an authorised account authorised with their mobile number or with their email. So, if incase of any misusage of this advantage we are able to take an action easily.

Impovisement

We can improve the user experience by monitering the users usage and can deliver best and fit news for each and everyone. The user can also be able to see the content in category wise.
